MILITARY TRAINING ROUTES (MTR)
All IR and VR MTR's are shown, and may extend from the surface upwards. Only the route centerline, direction of flight along the route and the route designator are depicted - route widths and altitudes are not shown.
Since these routes are subject to change every 56 days, and the charts are reissued every 6 months, you are cautioned to contact the nearest FSS for route dimensions and current status for these routes affecting your flight.
Routes with a change in the alignment of the charted route centerline will be indicated in the Aeronautical Chart Bulletin of the Airport Facility Directory. Also, the VFR Wall Planning Chart is issued every 56 days and displays current route configurations and a composite tabulation of altitudes along these routes.
Military Pilots refer to Area Planning AP/1B Military Training Route North and South America for current routes.
